## 👉 Preferences, Pick Sheet, and

### “Anything Special?”

Note: This is a quick and simple procedure, often added on to a bigger procedure.

Color code:

Surgeon
Anesthesia
Nursing
Scrub
Surgical Assistant (Not necessary for this case)

## Pre-op

Surgeon signs chart, and reviews his own consent form with patient and a witness **prior to** administration of an anxiolytic or other medication rendering a patient incompetent to sign. Minors may receive an anxiolytic prior to the surgeon’s consent since they are not signing.

## Prep Tray

## Instruments & Supplies

Curved hemostat  
Curved scissors (iris or tenotomy)  
Large nonsterile gloves are fine.  
Ray-tec gauze  
Silver nitrate (available in room)

## Equipment

Headlight

## Patient in Room to Induction

Position the patient at the tippy-top of the bed.

If intubating, I need access to the shortened frenulum and may rearrange the tape.

## From Induction to Start

## Mid Operation

The frenulectomy is non-sterile and quick.

## Closing

## Emergence to Patient Exit
